SAULO VARGAS

Senior Product Engineer | Full-Stack TypeScript

saulo@rusticit.com • +54 9 2284 55-6483 • Olavarría, Argentina • linkedin.com/in/saulovargas

SUMMARY

Senior product engineer with 18+ years delivering production software across industrial compliance, healthcare, SaaS, sports technology, and global-scale applications. Deep frontend expertise in TypeScript, Vue, and Angular, complemented by hands-on React, Node.js, APIs, databases, and deployment. Contributed to software serving tens of millions of users across 1,120+ languages and led end-to-end delivery for international clients. Brings strong product judgment, implementation ownership, and cross-stack execution.

EXPERIENCE

Software Engineer. Volunteer, Part-Time **November 2025 - Present**

Confidential Global Nonprofit Organization *US, Remote*

- Contributing to a cross-platform study app for Windows, iOS, Android using web technologies and Rust.
- Building atomic UI components from Figma specifications, including inputs, base primitives, and multi-state workflows.
- Shipping features for a platform available in 1,120+ languages and used by tens of millions globally, within strict accessibility, internationalization, and quality standards.

Full Stack Software Engineer. Contract, Part-Time **December 2024 - April 2026**

Rösberg *Germany, Remote*

- Owned most of SmartExi's implementation—a browser application using tRPC, Prisma, and PostgreSQL for ATEX safety calculations, explosion-protection workflows, and PDF certificate generation.
- Delivered UI flows, data models, safety logic, and release automation across the full stack, accelerating the product to release readiness.
- Built 20+ custom Angular item types for the LiveFORMS.web viewer, covering dates, photos, formulas, and other structured inputs.

Full Stack Software Engineer. Contract **April 2023 - December 2024**

Synphonyte *Germany, Remote*

- Implemented image upload, gallery browsing, and plantation-growth tracking in Rust and Leptos for PlantMyTree.
- Contributed reusable utilities to Leptos-Use, Synphonyte's open-source library for the broader Leptos ecosystem.

Full Stack Software Engineer. Contract **March 2022 - March 2023**

Ranker *US, Remote*

- Delivered pixel-perfect, animation-heavy features for WatchWorthy, a consumer mobile app for personalized TV and streaming recommendations.
- Implemented 10+ onboarding and recommendation features across Vue, Nuxt, Node.js, Sequelize, and Cytoscape.js.
- Maintained design fidelity and consistent behavior across Android screen sizes and resolutions.

Full Stack Software Engineer. Contract **June 2018 - February 2022**

Synphonyte *Germany, Remote*

- Built complex workflows for Canaray Voxel, a dental imaging app: drag-and-drop tree views, anatomy organization, case navigation, and collaboration tools.
- Designed Render Tests, an internal regression-detection workflow using GitLab, Slack, and Trello to catch visual side effects.
- Created an internal Chrome extension to inspect rendered-view data flow, improving debugging and developer onboarding.

Founder & Principal Engineer. Independent Practice **June 2018 - Present**

RusticIT *Argentina*

- Founded and led an independent product engineering practice building customer portals, SaaS platforms, internal tools, and marketing websites for international clients.
- Delivered 15+ projects per year across 5 countries; grew and coordinated a team of up to 7 people.
- Designed and shipped EntrenoLibre, including an LLM-powered coach that interprets live match state and delivers contextual guidance inside tennis and padel tracking workflows.

Lead Full Stack Software Engineer **November 2008 - August 2018**

Municipality of Olavarría *Olavarría, Argentina*

- Led engineering and long-term maintenance of public-health systems used by 1,000+ internal users across healthcare and administrative areas.
- Consolidated 900,000+ fragmented patient records into 300,000+ unified records (~67% reduction) with zero known false positives.
- Contributed improvements that supported ISO 9001 quality standards for patient admission and identification.

EDUCATION

Systems Analyst **2014 - 2017**

Instituto Superior de Informática Virasoro *Olavarría, Argentina*

SKILLS

Product Engineering: End-to-End Ownership, System Design, Accessibility, Internationalization, Cross-Platform Development, Technical Leadership.
Frontend: TypeScript, Vue, Nuxt, React, Angular, Three.js, Vite, GSAP.
Backend & Data: Node.js, tRPC, Prisma, PostgreSQL, Sequelize, MySQL, SQL Server, Strapi.
Delivery & Quality: Git, GitLab CI/CD, Deployment Automation, Visual Regression Testing.
Additional: Rust, Leptos, Java.
